precedent, and accordingly their legality

THE PRESIDENT'S LETTER.

The President's utterances are generally distinct, outspoken and point. His letter of yesterday partakes of this character. There is no opporsays, is not alone to reconcile differences in the details of a bill, but to decide be saved or abandoned. The bill as disfigured by the Senate is an abandonment of Democratic principles.

The President insists that no tariff measure can accord with Democratic principles that does not provide for previously acknowledged free raw materials in the interest of the people and the manufacturers, and Little C. Blust and others. he severely criticises those Democrats Ella Coulter and others. who would put the wool of the farmer Irms V. Rosenberg and others ........ on the free list, and place the protect Jacob Israelson and others... tion of tariff taxation around the iron Florence Fisher and others. ore and coal of corporations and capi-

Of course, the President's letter will

be criticised as an interference with legislation. Of course, he will be attacked by the roistering Reed and the anti-Cleveland organs. But the American people like frank, open talk, and Congress would follow Mr. Cleveland's advice, the country would be better off to-day than it is, business would be more active and prosperous than ever and labor would find employment.

ON TRIAL AT LAST.

The trial of the accused Police Captain Doherty and his ward men. Hoch and Mechan, at Police Headquarters yesterday, was threatened with interruption at the beginning by the service of a writ of prohibition, granted by Judge Dugro, of the Superior Court, directing the Commissioners to show cause why they should not be enjoined from proceeding with the cases.

The writ took the Commissioners by surprise, but Mr. Wellman at once recognized the situation, and, after moving an adjournment until 2 o'clock, has-tened over to Judge Gildersleeve's court and moved that the writ or order e vacated. Mr. Goff was present in the court with the counsel for the accused policemen, but Judge Gildersleeve, after a brief examination of the writ, vacated it. The parties then returned to Police Headquarters, and in the afteron the trials proceeded, the effort to interrupt them having signally failed. It seems a very poor policy to seek to prevent a fair and prompt trial of the cused officers. There is no other way of getting them off the force if they are guilty, and certainly no true reformer can favor their retention. The

Lexow Committee in especial has ex-

pressed its conviction that the accused

officers are guilty, and certainly no

person connected with that Commit-

ee can fall to desire their removal from the force. Besides, there is every promise of gain for the Committee in its future work by allowing the police trials to proceed. It has been said they will result in whitewashing the defendants. If so, the escape of the accused will be a serious charge against the Commissioners themselves. It is also said that the captains and ward men can implicate the Commissioners in the crimes alleged against the force. If the Commissioners convict and discharge the men who are alleged to be their accomplices, it is much more likey that testimony can be secured against the former than it would be if the defendants are allowed to escape.

s to purify the force. How can this be single blackmailer charge of a precinct as captain or

Let the suspected men have fair trials, and if the evidence is conclusive against them, let them be weeded out of the force as rapidly as possible.

### THEIR SPECIALTY IS TYPOMACHY. Mounseer J. Jawster Corbett, profes

### AT LONG BRANCH.

A Successful Entertainment for the

Fund Last Night. The West End Amusement Hall, Long Branch, had a fashionable audience last night at the entertainment given in aid "The Evening World's" Sick Babies' Fund. Jerome's play, "Fennel; or, The Violin-Maker of Coronna," was given, with Dr. Roberto Deshon in the role of Filippo. He played with true artistic appreciation of this difficult character and much sympathetic expression. Miss Edna Miller was successful as ning, looked a picture and received many floral offerings. Mr. Jerome Mon-helmer and Mr. C. Throcmotton acted heimer and Mr. C. Throemorton acted well, and the performance reflected great credit on Mr. Charles Trier, under whose direction it was produced.

The second part of the programme had many attractive features. Baby Parker, of Joseph Jefferson's company, recited and sang, and was three times recalled. The Dore Brothers, banlo players, assisted by Charles Landon players, assisted by Charles Landon players, assisted by Charles Landon, which were enthusiastically received. Henry Levy, a talented young New York planist and pupil of Arthur Friedmeim, played Chopin's Politics in A flat with power and sympathetic expression. Queene Vasar, of A Lind C. Chinadown's fame won admiration. expression. Queene Vassar, of A p to Chinatown' fame, won admiration and appause. Judge William B, Green gave his humorous selections with splendid effect, and a little young lady. Nellie Marks, a visitor at the Branch from Nashville, Tenn., made quite a hit by her clarer resilling shering and daughty. singing and dancing

pulldings and from the narrow alleyways leading from the side streets. ways leading from the side streets.

They succeeded, by hard work, in mastering the flames after \$30,000 dambers. It is a feeling of intense admiration, a

Budd's putty factory, at 149 Bank street, standing in front of the factory, saw a bright giare in Putty alley, two doors away. Putty alley extends back towards the centre of the block, with Joseph Deane's stables on the east, and Hass & Husman's can factory on the west.

It din't take the watchman long to run the length of Putty alley and find that at the rear of the can factory, one hundred and fifty feet from the street, fiames were raging fiercely in Hass & Husman's engine-room.

The cries of "fire" which he uttered as he sped up the street towards the nearest fire-box, aroused John Kennedy, a foreman for Joseph Deane, who lives in a portion of the stable building with his family. Hy the time Kennedy got into Putty alley, the fiames had shot from the engine-room up the rear of the can factory building, and had fired an enormous wooden shed, covering a storage lot in the rear of the structure.

The shed was burning with frightful rapidity, and the fiames were fast making in the direction of a five-story unoccupied factory building to the wost of the shed and in the rear of the stable.

There were thirteen horses in the stable, and beane, with the assistance of bystanders, who had been attracted to the scene by his cries, succeeded in blindfolding them and leading them safely from the building just as the first engine came rattling up.

A second and a third alarm were at once sent out, as it looked as though the block was doomed.

The fire was awkwardly situated, and by the time lines of hose were stretched the time lines of hose were stretched the current process of the shee of the sheet of the seen out, as it looked as though the block was doomed.

The fire was awkwardly situated, and by the time lines of hose were stretched the street by the sevenstory.

The fire was awkwardly situated, and by the time lines of hose were stretched through Putty alley, the seven-story building of the Froment Steel Company, next door west of the can factory, was a roaring furnace.

The fire had eaten its way to the top floor of the three-story can factory, and was licking the sides of the unoccupied building beside the shed.

With the arrival of the additional engines two more alleyways were used.

three, is in a cell at the Seventeenth rant sworn by G. W. Landes, of Knox-

Thomas Lawlers, a watchman for Budd's putty factory, at 149 Bank street, brother); a feeling that we must constantly be standing in front of the factory, saw a in the sight and hearing of the one we adore.

when Mrs. Lyons put in an appearance in advance of her other domestics.

Mrs. Lyon bravely jumped to the assistance of her butler, and managed to disarm the enraged cook. This made the cook still more furious, and, swearing that she would have the butler's life, she rushed into the dining-room and picked up a carving-knife. The butler did not wait to be carved, and made himself scarce. The other servants then disarmed the fat cook and placed her in a room where a guard was put over her to prevent her from doing any further mischief.

She raved the entire night, swearing that she would surely kill the butler, as he had insulted her. Mrs. Lyon tried to reason with her, but she continued her actions the following day, renewing her oaths of killing Branie. He then decided to seek the aid of the law, and secured a warrant for her arrest, which was served yesterday by Court Officer Tucker. Tucker.

When arraigned before Justice Meade, in Yorkville Court, to-day the cook claimed that Bramie had assaulted her and thrown her down a flight of stairs. She was held for trial.

The fire was awkwardly situated, and

With the arrival of the additional engines, two more alleyways were used, one of them runs directly through the eight-story building of the New York Car-Wheel Company, on the West street side of the block, and the other, only two feet wide, on the Bethune street side, between the tail front and rear tenements.

I am opposed to the diagusting habit of kissing, especially in public. What kind of a mother must this be who silows her daughter to stay out at such a late hour with elderly gentlement. What of his wife and children waiting for him archimeter.

a flames avery to how from floor to how ity minutes every aperture window had been was a mass window had been was a mass window high sheets of flame to have a which circular which circular which circular with the circular window in the circular window

the Bethune street side of the block. The tenants in the four big tenements fronting on that street, directly behind where the fire was raging, were in the wildest state of panile.

Aroused from their sleep, to be met by the ruidy glare of flames, that lighted up sky and earth, they made a hasty exit, leaving their belongings behind, without even waiting to clothe the madeves.

factory, entirely gutting the two upper floors and making great holes in the roof.

The box factory building is a total loss, as well as the shed and a two-story brick workshop of the New York Car-Wheel Company. The Car-Wheel Company Brown of the New York of investment Suburban lots do not pay any ing of the Frontet Steel and Iron Works was damaged. The sever-story building was not had in the lower floors.

The Bethune street rear tenements were only scorched, but the water did much damage. Deane's stables were slightly damaged.

The firemen consider the estimated loss of \$20,000 a conservative one.

No idea can be formed of the cause of the fire, as, it is chalmed, there had not been a fire in the engine-room, where it started, for several hours.
